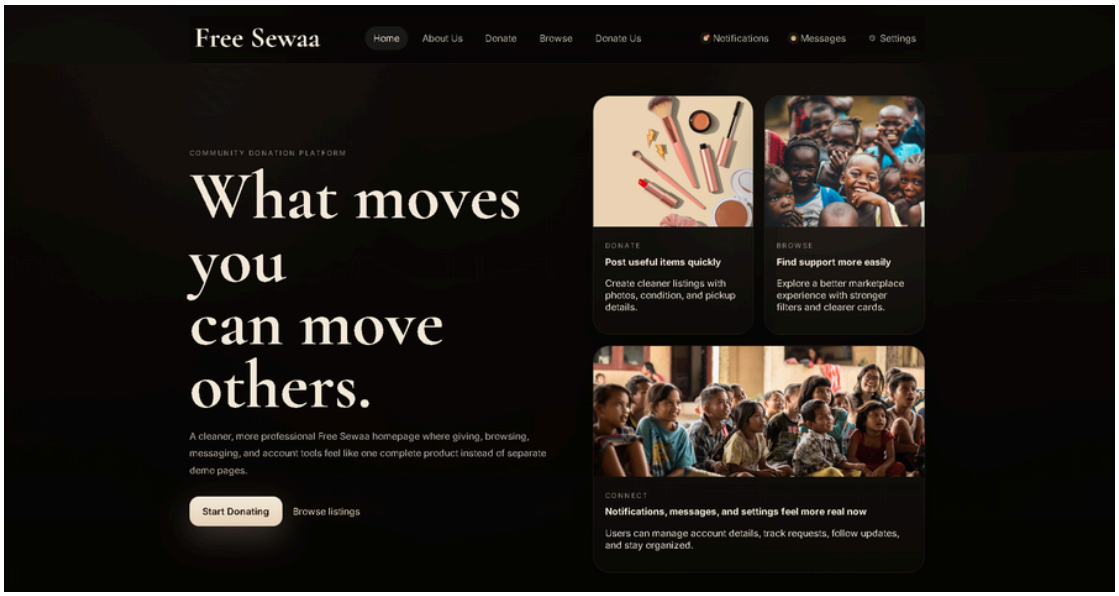
Free Sewaa

Share More. Waste Less.

Free Sewaa connects people who want to donate usable items with those who need them. It reduces waste and supports communities through simple, accessible technology.



[Ihttp://localhost:3000/browse.html]

The Problem

Usable items are thrown away every day
Many people cannot afford essential items
There is no simple platform for free item sharing

This leads to unnecessary waste and limits community support.

Target Users

Students
Low-income individuals
Families
Community donors

A student moving to a new city needs furniture but cannot afford it.

Our Solution

Free Sewaa is a community-driven platform where users can donate items they no longer need and request items they require. It connects people locally to reduce waste and support those in need through a simple and accessible system.

Simple. Accessible. Community-focused.

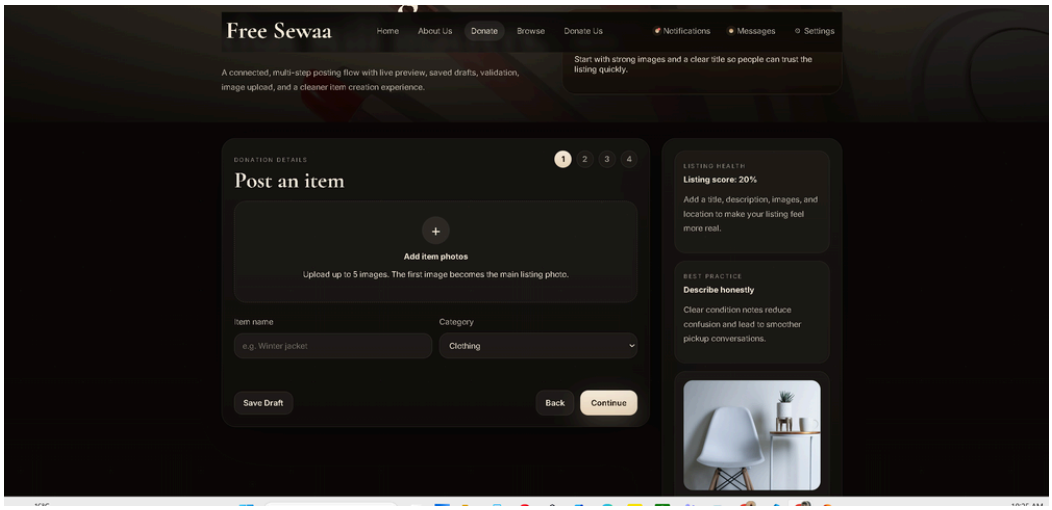
Core Features

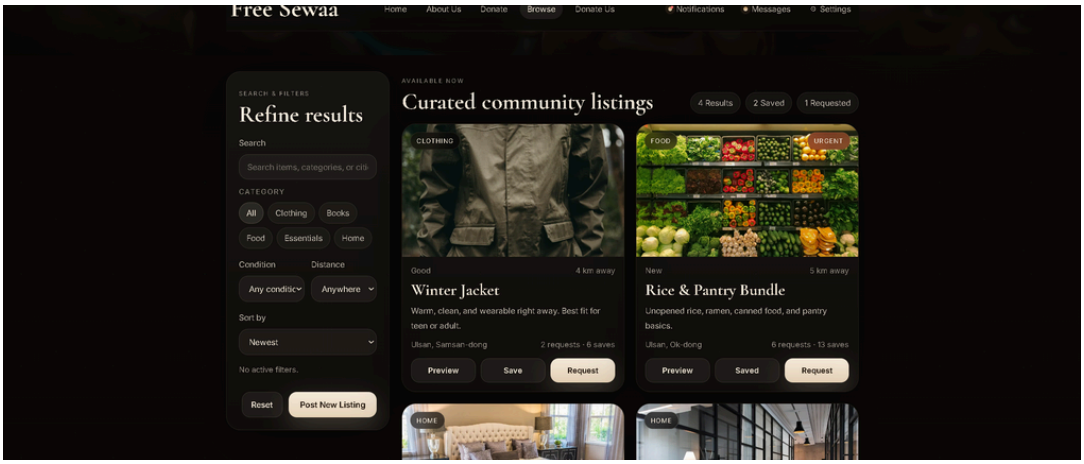
Secure Login / Signup
Users can create accounts safely using Firebase
Post Items
Upload items with images and descriptions
Browse Items
View available donations easily
Request Items
Users can request items directly
Contact Donor
Communicate with item owners

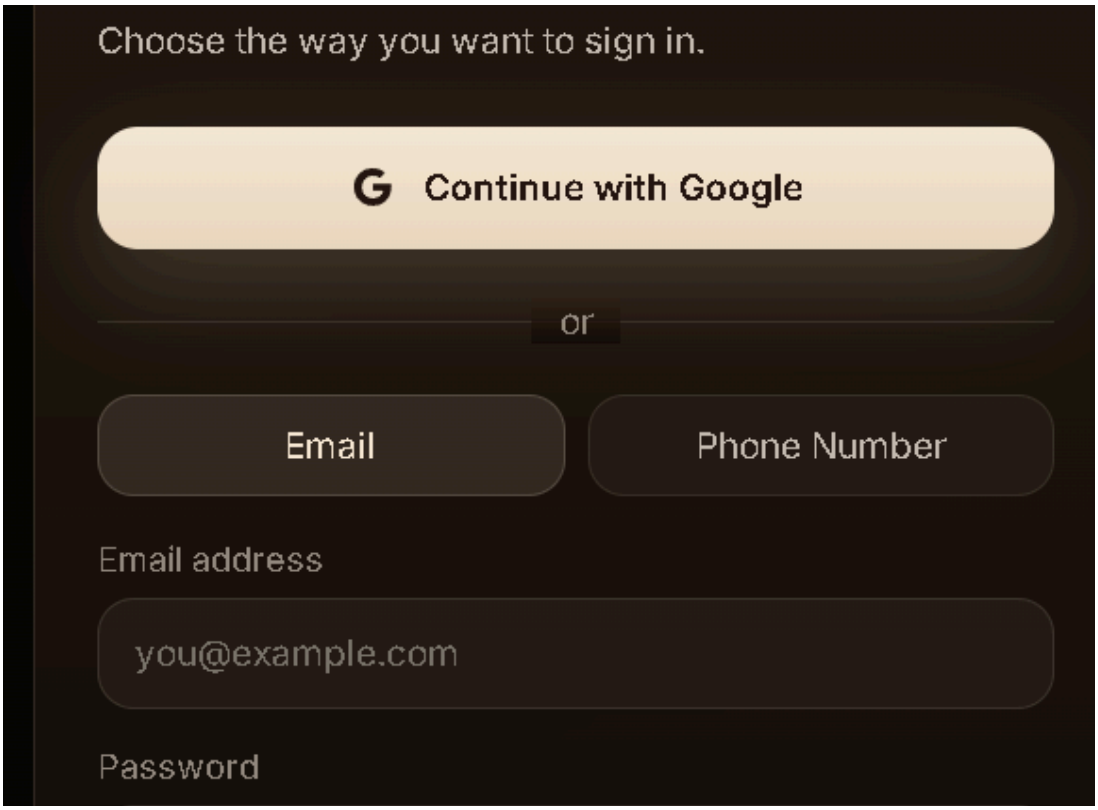
Why It Works
Free Sewaa simplifies the process of sharing resources, making it easier for people to give and receive without cost barriers.

Current Progress

Working UI, Firebase Authentication, Item Posting, Browse System, Basic Request Flow.







Roadmap

Midterm: UI + Auth + Basic Features.

Final: Backend, Chat, Notifications, UI Improvements.

Future: Mobile App, AI Recommendations, Location-based matching.

Team Roles

Frontend, Backend, Database, QA.

Our Ask

We are looking for early users, feedback, and technical mentorship.
